FOR IMMEDIATE RELEASE

## MEXICO GETS A RIPPLE GATEWAY

**Puebla, Mexico** – April 6th, 2014 – Bitso is pleased to officially announce today the launch of the first Ripple Gateway in Mexico, and first issuer of Mexican Peso (MXN) IOUs on the Ripple Network.

"Bitso is committed to developing the infrastructure required to revolutionise the incumbent remittance ecosystem in Mexico, harnessing the transformative new innovations of cryptocurrency," said Bitso CTO and co-founder Ben Peters.

In addition to facilitating directly the creation of a US-Mexico corridor on the Ripple network, this latest development will enhance the functionality of the Bitso Bitcoin Exchange, allowing for easier funding of accounts and boosted liquidity.

In addition to MXN issuance, Bitso, a member of the IRBA (International Ripple Business Association), is also an issuer of XBT (bitcoin) IOUs, with more currencies to come.
